Drinking water filter “FU2-190“

Eliminate bacteria and plastic bounded pollutants

Picture Art. no. 000.000.412

Eliminate bacteria and plastic bounded pollutants out of the drinking water

Description

- Medical standard (total disinfected)
- Line installation for 1-way, 2 way- or 3 way faucet.
- Easy mounting with quick connectors.
- Filter pore size 0,15 µm (0,00015 mm)
- Retention approx. 99,999999 %
- Flow rate approx. 7,9 liter per minute (3,2 bars - 47 psi)
- Filter life time approx. 20.000 liter (2000 KBE / cm³)
- Filter surface 1719 cm²
- Valves for the easy filter changing
- Recontamination lock
- Temperature resistant up to 60 °C (max. working temperature)

Installation option A

Installation option B

Extent of delivery (FU2-190)

Technical datas	FU2-190
Housing length (without connections)	max. 220 mm
Housing diameter	max. 31 mm
Working pressure	max. 10 bars
Connection threads	optionally 3/8" or 1/2"
Packing measures carton	31 x 22 x 4 cm (LxWxH)
Packing weight carton	0,9 kg
Art. no. Drinking water filter FU2-190	000.000.411
Art. no. Replacement filter U2-190	000.000.412
